

COVID-19 Vaccines Community Resources

[AIMGA – HealthHub for Newcomers: COVID-19](#)

Alberta International Medical Graduates Association (AIMGA) is a non-profit organization dedicated to the successful integration of International Medical Graduates (IMGs). They also provide information sessions which include an overview of services and programs and career sessions to ensure the public are making informed decisions regarding healthcare and the medical profession.

[CANVax](#)

CANVax produces its own resources created by the Canadian Public Health Association (CPHA) in addition to our online database, which contains content from Canadian and international organizations. Resources by CANVax include webinars, podcast, brief, tools, online learning opportunities, and additional immunization resources.

[Children’s Healthcare Canada](#)

This resource hub seeks to advance the awareness of, knowledge, and resources available to frontline child and youth healthcare providers responsible for vaccination, in order to ensure they can safely and confidently vaccinate children, including those who have increased risks associated with COVID-19 and other vaccine-preventable infectious diseases, build the capacity (and confidence) of healthcare providers as vaccinators and vaccination promoters, share credible current knowledge with Children’s Healthcare Canada’s family partners to inform their vaccination decisions for their child(ren).

COVID-19 Vaccines Community Resources

[Covid-19 Resources Canada](#)

From data discussions to mortality tracking, this website encourages open conversations about vaccines, virology, and concerns with a return to “normal”. Their projects include funded research by experts and community-based initiatives.

[GIS Hub by Esri Canada](#)

This hub has dashboards of weekly COVID-19 updates based on weekly provincial cases, deaths and hospitalizations, which allows the public to stay updated on data metrics. It also offers international resources and demographics to encourage public health and safety during the pandemic.

[Government of Canada: About Coronavirus disease \(COVID-19\)](#)

The official Government of Canada website has various digital tools to help you stay informed about Covid-19, as well as manage mental and physical well-being with additional stresses from the pandemic.

[Health Canada - Get the facts: Vaccinating children against COVID-19](#)

Health Canada has approved the COVID-19 vaccine for children. This website provides information about vaccines for children.

COVID-19 Vaccines Community Resources

[Immunize Canada](#)

This website is for Canadians, including healthcare consumers and providers, who are seeking reliable information on immunization for all ages. It is developed, published, managed and updated regularly by the Secretariat for Immunize Canada, and the content is reviewed by immunization experts.

[Ontario COVID-19 Science Advisory Table](#)

A clinical summary of recommended drugs and biologics in adult patients with COVID-19.

[Ontario Health: COVID-19 Health System Response Materials](#)

This website provides information shared with the Ontario health care system and generated by the COVID-19 health system response effort.

[Ontario Science Centre](#)

The Science Centre is a space where visitors of all ages can learn-through-play and discover ways to think like a scientist every day. This online resource addresses the spread of digital misinformation regarding Covid-19 vaccination, covering topics like the scientific method, pandemic inequalities, and critical thinking skills.

COVID-19 Vaccines Community Resources

[Public Health Ontario](#)

A hub for COVID-19 resources and information. Public Health Ontario provides scientific and technical advice to the Ministry of Health, local public health units and other health system partners to support COVID-19 response efforts.

[Refugee 613](#)

A newcomer hub with multilingual, culturally appropriate COVID-related information.

[Science North](#)

Science North has launched "Give Vaccines a Shot" a series of videos, school programs, podcast episodes, and other online activities with accurate science content that will increase your confidence in science. These are great tools to understand vaccinations and your health.

[University of Waterloo: Childhood Vaccines](#)

This decision aid for childhood vaccines is produced by University of Waterloo. It covers the essential information as to why now is the right time to vaccinate children aged 5 to 11 against Covid-19, including research results for Pfizer and Covid-19 infection in children.
